

PRODUCTION

Updated 09-09-2019

ALTAS AUTO's production is dedicated to mini and midi class buses. The mini class has been a focus of the company's operation since its establishment, with the company currently offering 6 models. The company entered the Midibus production market in 2018 with the introduction of ALTAS AUTO's own brand bus, ALTAS Viator.

Minibuses

ALTAS AUTO is currently the market leader in Scandinavia and has been a European leader in minibus sales since 2016. The company currently produces 6 models built on the Mercedes-Benz, Volkswagen, MAN and Iveco platforms.

Midibuses

ALTAS Viator

29 + 1 seater midibus perfectly suited for comfortable tourist journeys.

This model was presented to the market in 2018 and became the first passenger bus to be developed for serial production in the independent Lithuania. The bus is currently being tested in various operating conditions and its serial production will begin in Q4 of 2019. At later stages of the product's development, new ALTAS Viator models are planned, including a low-floor urban model, suburban model, school bus and a model adapted to UK traffic. ALTAS Viator also received the prestigious "A' Design Award" Silver nomination 2019 for its design.

Built on an Iveco 70C18 Diesel chassis.
